CAREER SUMMARY

I'm a software developer from Hong Kong, currently staying in United Kingdom. During the past few years, I've been working as software developer in Banking and Finance industries. Key Skills: Java, Hibernate, Spring boot, Microservices, JSF, Angular, Hybrid mobile app, SQL

WORK EXPERIENCE

Analyst Consultant   GreySpark Partners

Nov 2017 - May 2019

Role Description:

As a technical consultant, my main duty is fulfilling the needs of the clients including analyzing their requirements, on-site development, system reviewing and giving improvement advices on system architecture and work flow.

Project:

🖥 **Internal Centralized Data Dashboard System**

@ Haitong International Securities Group Limited

- Transforming current system to microservices approach.
- Consolidating different data sources, e.g. Excel, CSV, XML, etc.
- Full-stack development, front-end using JSF (with PrimeFaces), back-end using Java, Spring Boot, Hibernate

Business aim of the project is facilitating the daily works of operation departments by integrating the manual process into the system and generating meaningful data automatically.

Technical aim of the project is transforming the current system into mircoservices approach.

Joined an agile team and closely worked with internal business analyst to gather user requirements. Performing system and data structure design and full-stack development including front-end using JSF (PrimeFaces) and back-end services using Java, Spring boot, Hibernate, Microservices. Consolidating different data sources, e.g. MS Excel, CSV, XML, etc. into the system.

Technologies used:

Java 8 · Mircoservices · Spring Boot · RESTful · Hibernate · EJB · JavaScript · JSF · PrimeFaces · Oracle DB · SQL · Git · Jira

Analyst Programmer   ICO Limited (Hong Kong)

Sep 2016 - Oct 2017

As an analyst programmer, my main duties are performing high quality code implementation and working with the seniors to keep the project going smoothly and facilitate the communication between users and the project team.

Project:
